INTRODUCTION

Behavioral research suggests that the most effective people are those who understand themselves, both their strengths and weaknesses, so they can develop strategies to meet the demands of their environment.

A person's behavior is a necessary and integral part of who they are. In other words, much of our behavior comes from "nature" (inherent), and much comes from "nurture" (our upbringing). It is the universal language of "how we act," or our observable human behavior.

In this report we are measuring four dimensions of normal behavior. They are:

- how you respond to problems and challenges.
- how you influence others to your point of view.
- how you respond to the pace of the environment.
- how you respond to rules and procedures set by others.

This report analyzes behavioral style; that is, a person's manner of doing things. Is the report 100% true? Yes, no and maybe. We are only measuring behavior. We only report statements from areas of behavior in which tendencies are shown. To improve accuracy, feel free to make notes or edit the report regarding any statement from the report that may or may not apply, but only after checking with friends or colleagues to see if they agree.

*"All people exhibit all four behavioral factors in varying degrees of intensity."
—W.M. Marston*

GENERAL CHARACTERISTICS

Based on John's responses, the report has selected general statements to provide a broad understanding of his work style. These statements identify the basic natural behavior that he brings to the job. That is, if left on his own, these statements identify HOW HE WOULD CHOOSE TO DO THE JOB. Use the general characteristics to gain a better understanding of John's natural behavior.

John likes to get results through others. He is at his best when he has people working with him. He likes to develop people and build organizations. He wants to be seen not only as a team player, but also as a leader of the team. He tends to trust people and may be taken advantage of because of his high trust level. John believes in getting results through other people. He prefers the "team approach." He, as a manager, supervisor or group leader can use his people skills to build group involvement and increase participation from the group. He projects a self-assured and self-confident image. He has a strong ego and usually projects this ego in friendly terms. John does not like other managers looking over his shoulder. He seeks popularity and social recognition. He likes to deal with people in a favorable social environment.

John likes to be involved in the decision-making process. He is good at solving problems that deal with people. He tends to break the rules and then attempts to sell you on the fact it was the proper thing to do. He may be inconsistent in disciplining others. Sometimes he will seek the quick and simple decision. His aversion to detailed work motivates his desire for simplicity. He can make decisions even though some of the facts to support the decision may be missing. He tends to make snap judgments or impulsive decisions. He will not be overlooked nor uninvolved. He will consistently try to inspire

GENERAL CHARACTERISTICS

THE SUCCESS INSIGHTS® WHEEL

The Success Insights® Wheel is a powerful tool popularized in Europe. In addition to the text you have received about your behavioral style, the Wheel adds a visual representation that allows you to:

- View your natural behavioral style (circle).
- View your adapted behavioral style (star).
- Note the degree you are adapting your behavior.
- If you filled out the Work Environment Analysis, view the relationship of your behavior to your job.

Notice on the next page that your Natural style (circle) and your Adapted style (star) are plotted on the Wheel. If they are plotted in different boxes, then you are adapting your behavior. The further the two plotting points are from each other, the more you are adapting your behavior.

If you are part of a group or team who also took the behavioral assessment, it would be advantageous to get together, using each person's Wheel, and make a master Wheel that contains each person's Natural and Adapted style. This allows you to quickly see where conflict can occur. You will also be able to identify where communication, understanding and appreciation can be increased.
