INTRODUCTION

Behavioral research suggests that the most effective people are those who understand themselves, both their strengths and weaknesses, so they can develop strategies to meet the demands of their environment. Our ability to interact effectively in any given environment may determine the difference between our success or failure in the workplace and in our personal relationships.

Effective use of time starts with an accurate perception of ourselves. This report was designed to quantify information on how you see yourself. The report translates that information into how others may see you to assist in formulating strategies to better manage your time.

Is the report 100% true? Yes, no and maybe. We are only measuring behavior. We only report statements which are true for you and areas of behavior in which you show tendencies. Delete any statement from this report that you feel doesn't apply after checking with a friend or colleague to see if they agree with you. Sometimes we are not aware of certain behavioral traits that are seen by others.

"All people exhibit all four behavioral factors in varying degrees of intensity."
–W.M. Marston

TIME WASTERS

This section of your report is designed to identify time wasters that may impact your overall time use effectiveness. Possible causes and solutions will serve as a basis for creating an effective plan for maximizing your use of TIME and increasing your PERFORMANCE.

    Do not conceptualize a system for grouping information and materials
    Have not established a timeline for tasks or projects

    POSSIBLE SOLUTIONS:
    Handle each piece of mail only once, i.e. pitch it, file it or delegate it
    Set up (or have someone else set up) an information storage and retrieval system
    Get off mailing lists that are of no interest to you
    Remind yourself that the time it takes to open "junk" mail robs you of time for more important tasks

THE SUCCESS INSIGHTS® WHEEL

The Success Insights® Wheel is a powerful tool popularized in Europe. In addition to the text you have received about your behavioral style, the Wheel adds a visual representation that allows you to:

- View your natural behavioral style (circle).

- View your adapted behavioral style (star).

- Note the degree you are adapting your behavior.

- If you filled out the Work Environment Analysis, view the relationship of your behavior to your job.

Notice on the next page that your Natural style (circle) and your Adapted style (star) are plotted on the Wheel. If they are plotted in different boxes, then you are adapting your behavior. The further the two plotting points are from each other, the more you are adapting your behavior.

If you are part of a group or team who also took the behavioral assessment, it would be advantageous to get together, using each person's Wheel, and make a master Wheel that contains each person's Natural and Adapted style. This allows you to quickly see where conflict can occur. You will also be able to identify where communication, understanding and appreciation can be increased.
